Screen orientation: Select if the room panel will be viewed in landscape or portrait. The screen will automatically change when you select

Network Setup: here you will select which network the room panel will be connected to. This window will not appear if the room panel is connected through cable Server Address: This determines which server the room panel will connect to. Server address is provided by Flowscape or an installation partner.

Verify Access: here you will enter the server login name and password. The login credentials are created in the Flowscape Portal. **Device Selection:** If your office set-up consists of multiple sites, buildings and floors you will be given the option to choose which site, building and floor the room panel will be connected to before selecting panel.

It is the panel you select here that will be connected to the meeting room. New panels can be created in the Flowscape Portal.

Click "CONTINUE" to launch the device.

NOTE: If the panel shows a lock icon it is already a Room panel connected to the device. If you click "OK" the old room panel will stop working and be replaced with the new one.
